PROFILE

Backend developer with Java/Spring Boot and Python/Django experience, focused on REST APIs, layered backend logic, relational databases and practical web applications. Freelance and internship background covering backend services, API-driven frontend integration, PostgreSQL schemas, authentication, validation, testing and Git-based delivery. Daily programming discipline, clean project ownership and strong focus on offer-ready backend portfolio growth.

CORE STACK

- Java 21, Spring Boot, Spring Web, Spring Data JPA, Spring Security
- Maven, JUnit, REST APIs, layered backend architecture, validation
- PostgreSQL, SQL, MySQL, SQLite, relational data modeling
- Python, Django, Django REST Framework, FastAPI basics, ORM, admin
- HTML, CSS, JavaScript, React, Vite, API integration
- Git, GitHub, IntelliJ IDEA, PyCharm, Docker basics, AWS basics, AI tools

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer - Upwork / Remote 09/2024 - 05/2026

- Delivered backend and full-stack features for international web/SaaS clients, translating product requirements into working technical solutions.
- Built REST API features with Java/Spring Boot and Python/Django/FastAPI; worked with layered architecture, business logic and validation flows.
- Designed PostgreSQL/SQL data models, relationships and queries for structured application data.
- Integrated React/HTML/CSS frontend views with API-driven backend logic and dynamic user flows.
- Implemented AI/LLM-powered automation features using OpenAI/Claude APIs, including content generation flows, response automation and structured JSON output handling.
- Used Git/GitHub for version control, branches and delivery; worked with Docker/AWS basics for reproducible development and deployment workflows.
- Used AI development tools for debugging, refactoring and architecture support while keeping manual code ownership and implementation control.

Python Backend Developer Intern - UI Technologies LLC, Minsk 03/2024 - 09/2024

- Worked on web application tasks using Python, Django, SQL, HTML/CSS and Git.
- Implemented backend features, validation, authentication-related logic, debugging and testing-minded improvements.
- Practiced relational models, ORM workflows, API/backend flow and collaboration with developers in structured development cycles.

PROJECTS

Habit Tracker API | Java, Spring Boot, REST API, PostgreSQL, Maven, JUnit

- Spring Boot REST API for habit tracking, completion stats, daily discipline logic and analytics.
- Implemented CRUD endpoints, completion actions, search, priority filtering, request validation and statistics.
- Structured backend with controller, service, repository/model logic, Maven build and JUnit coverage.
- Repo: github.com/MiroCoder/habit-tracker-api

Beauty of Warsaw - Salon Explorer | Java, Spring Boot, PostgreSQL, React, Vite

- Full-stack web application for browsing beauty and hair salons in Warsaw with real salon records.
- Backend: Spring Boot, Spring Web, Spring Data JPA, Spring Security, PostgreSQL and REST endpoints.
- Frontend: React/Vite listing page, district filter, detail view, error handling and protected admin edit mode.
- Repo: github.com/MiroCoder/Beauty-of-Warsaw

Game Web Repeatin | *Python, Django, SQLite/MySQL, HTML/CSS*

- Django web app for browsing, buying and managing a video game catalog with game details and user profile/library.
- Practiced Django ORM, views, templates, admin panel, media handling, relational models and responsive UI basics.
- Repo: github.com/MiroCoder/game-web-repeatin

Automated Patient Information System | *Python, Django, SQL, HTML/CSS*

- Graduation thesis project for patient registration, appointments and medical records management.
- Implemented authentication, validation, reporting tools, Django backend flow and SQL database storage.
- Repo: github.com/MiroCoder/Web-systems-of-medical-clinic

EDUCATION

Master's Degree, Informatics - University of Zielona Gora, Poland *Expected 09/2027*

Bachelor of Science, Information Technology - BSUIR, Minsk, Belarus *06/2024*

LANGUAGES & WORK STYLE

Languages: English - C1 / professional working; Polish - professional working; German - basic, improving daily; Russian / Belarusian - native.

Work style: Daily programming discipline; project-based learning and delivery; code written, tested, understood and explainable; structured system for code, languages, body and long-term stability.

I consent to the processing of my personal data for recruitment purposes in accordance with the GDPR.
